## LUXURY LIGHTING!

**D**BEL is a luxury lighting brand that believes in enhancing the quality of a space through exclusive Lighting. And, we work with the best designers and architects to bring the best of any space that has been designed.

Some of our recent projects include Farzi café Chandigarh, Bo Tai, Mehrauli (yet to be launched), upcoming Co-working space in Delhi, IceCubes Services (office space in Raipur), Prime Craft Ventures (office space in Raipur), Mercedes Showroom and Patanjali showroom.

### Formats To Be Progressive

While design trends tend to run on the wheel, 2018 trend is all about reverting to simple clean fixtures. Accent lighting and dramatic effects for residential are becoming increasingly popular.

Commercial spaces, offices, retail and all active spaces are moving towards linear lights or profiles so that light fixtures become a part of the architecture rather than looking like separate fixtures.

### Functionality Choices

The 'Futuristic designs' in lighting will transform the functionality of lights by enabling it to create space rather than light design fixtures. ■
